6.0 USES OF COFOG AND ANALYSIS OF TOTAL GOVERNMENT EXPENDITURE BY FUNCTIONAL AND ECONOMIC CLASSIFICATIONS

- 6.01 Classification of Functions of Government (COFOG) permits trends in government Expenditure on particular functions or policy to be examined over time. Conventional government accounts are not usually suitable for this purpose because they reflect the organizational structures of government. Not only might time series be distorted by organization changes, but at a specific time some organization may be responsible for more than one function, and responsibility for one function might be divided among several organizations. For example, if a government establishes a new department that brings together some of the functions previously administered by several departments or at several levels of government, it will not usually be possible to use conventional accounts (GPFS) to compare Expenditure on these purposes over time. For example, at the Federal Level, the Ministry of Works; Housing and Urban Development; and Ministry of Power were hitherto different ministries, which were merged into one Ministry of Power, Works, and Housing in the 2019 Federal Budget.
- 6.02 COFOG is also used for making international comparisons of the extent to which governments are involved in particular economic and social functions. Just as COFOG avoids the problems of organizational changes in a single government, so too does it avoid the problem of Organizational differences among countries. In one country, for example, all functions connected with water supply may be undertaken by a single government agency, while in another country they may be distributed among departments dealing with the environment, housing, or industrial development. In Nigeria, the Ministry of Water Resources and Rural Development and Ministry of Agriculture provide water services.
- 6.03 For particular kinds of analyses, COFOG provides key aggregates that could be used as indicators or measures of results. For example, in studies of social assistance, information on past Expenditure on the social protection function could give an indication of changes in the support provided by government for the welfare of the population. Similarly, analyzing the impact of economic growth on the environment may require information on the Expenditure on environmental protection.
- 6.04 Government services can benefit the community either individually or collectively. COFOG is used to distinguish between individual and collective goods and services provided simultaneously to all members of the community or to all members of a particular section of the community, such as all households living in a particular region. One major characteristic of collective service is that its provision to one individual does not reduce the amount available to others in the same community or section of the community. There is no rivalry in consuming these services. An individual consumption good or services is one that is acquired by a household and used to satisfy the needs or wants of members of that household. Individual goods and services are essentially private as distinct from “Public” goods and services. One characteristic of individual consumption is that the household must have agreed to accept the provision of the good or services and take whatever action is necessary to make it possible, for example, by attending a school or clinic.
- 6.05 Expenditure incurred by government in connection with individual services such as health and education are treated as collective services when they are concerned with the formulation and administration of government policy, the setting and enforcement of public standards, the regulation, licensing or supervision of producers, etc. For example, the Expenditure incurred by Ministries of health or education at the state government level have been included in collective consumption as they are concerned with general matters of policy, standards, and regulations. The units of classification are, in principle, individual transactions. Each purchase of goods and services, wages payable, transfer, or other Expenditure have been assigned a COFOG code according to the function that the transaction serves in the State 2020 Budget and Accounts, which is also consistent with the national guideline.
- 6.06** All of the Main Function Codes 701 to 706 is collective services, as are sub function section 7075 of health, sections 7083 to 7086 of recreation, culture and religion, section 7097 and 7098, sections 7108 and 7109 of social protection. These sections cover expenditure on general administration, regulation, research, that is not recorded as investment in nonfinancial assets, and so on. The remaining sections of health, recreation, culture and religion, education and social protection are considered to be individual services.
